

Our material compositions are as individual as your requirements. The ideal composition of polyurethane, resin or rubber with the corresponding grain guarantees the perfect result. Regardless of whether initial equipment, tools with a long service life, economic variants or special glass: you decide what you need, we have the matching series.

THE GLOSS EXPERT: SERIES CE

Brilliantly white cerium oxide with an extremely fine grain is embedded in elastic resin, a rubber or polyurethane bond, depending on the application, for the best gloss possible.

EDGE PROFILES

Flat glass

Miter 45°

Bevel

Laminated safety glass
(LSG)

Arris

MACHINES

Single and double edger machines

TOOL

Product : ARTIFEX CE - 5
Bonding : Foamed polyurethane
Grain : Cerium oxide
Hardness : Hard elastic
Colour : White
Delivery form : Cup wheels with plate
and water bore holes
Dimension : Ø 75 - 170 mm

RESULT

High gloss

ADVANTAGE

Extremely long service life

Water holes make it possible: The CE - 5 Unique by ARTIFEX with its special bore holes ensures easier handling and an extremely fast feed.

Compared to contained and segmented variants, the cup wheels feature an outstanding grinding pattern – independent of the rotation speed.

Even thick glass can be polished to high gloss with high feed speeds.

The ARTIFEX promise

We stand for tools that guarantee the highest quality standards. All ARTIFEX products are „Made in Germany“ and their above-average service life speaks for itself.

Our service: You have individual requirements, we offer customised solutions regardless of the material, shape or dimensions. We will gladly advise you on your premises.
