

Our material compositions are as individual as your requirements. The ideal composition of polyurethane, resin or rubber with the corresponding grain guarantees the perfect result. Regardless of whether initial equipment, tools with a long service life, economic variants or special glass: you decide what you need, we have the matching series.

THE GLOSS EXPERT: SERIES CE

Brilliantly white cerium oxide with an extremely fine grain is embedded in elastic resin, a rubber or polyurethane bond, depending on the application, for the best gloss possible.

EDGE PROFILES

	Flat glass
	Miter 45°
	Bevel
	Laminated safety glass (LSG)
	Arris

MACHINES

Single and double edger machines

TOOL

Product :	ARTIFEX CE - J
Bonding :	Foamed polyurethane
Grain :	Ceroxid
Hardness :	Hard elastic
Colour :	Grey
Delivery form :	Cup wheels with plate Rings
Dimension :	Ø 75 - 170 mm

RESULT High gloss

ADVANTAGE Low tool costs

LSG

We offer this product series segmented with 3-mm or 5-mm slots for perfect laminated glass processing. Your advantage: no clogging of the cup wheels, no sticking of foil on the glass edges.

This is how easy it is to process laminated glass.

Not all edges are alike. The type of glass, the thickness and the glass profile determine the tool. ARTIFEX offers the right polisher for any edge. The classic polishing cup wheels and disks by ARTIFEX already result in an outstanding industry gloss. Afterwards, the cerium oxide products of the CE series provide the perfect high gloss.

The ARTIFEX promise

We stand for tools that guarantee the highest quality standards. All ARTIFEX products are „Made in Germany“ and their above-average service life speaks for itself.

Our service: You have individual requirements, we offer customised solutions regardless of the material, shape or dimensions. We will gladly advise you on your premises.
